

# Angus Australia

## REGISTRATION CERTIFICATE

Animal ID: DYF21S11  
 Animal Name: INGLEBRAE FARMS SMOKIN S11<sup>SV</sup>  
 NLIS Visual No/RFID: NE511475XBS10001 / -  
 Register: HBR  
 Sex: Male  
 Date of Birth: 03-JUL-2021  
 Colour: BLACK  
 Breed Percentage: AA 100%  
 Genetic Conditions: AMF,CAF,DDF,NHF,DWF,MAF,MHF,OHF,OSF,RGF  
 Breeder: INGLEBRAE FARM MANAGEMENT  
 Owner: QWW Wallangra Pastoral Co 100%

Sire: USA16198796 EF COMPLEMENT 8088<sup>PV</sup>  
 USA17082311 EF COMMANDO 1366<sup>PV</sup>

## EXPLANATION OF GENETIC CONDITION CODES

The genetic condition codes indicate the status of an animal for genetic conditions or traits monitored by Angus Australia.

AM	Arthrogryposis Multiplex
CA	Contractural Arachnodactyl
DD	Developmental Duplication
NH	Neuropathic Hydrocephalus
DW	Dwarfism
MA	Alpha Mannosidosis
OH	Oculocutaneous Hypopigmentation
OS	Osteopetrosis
RG	Red Gene
MH	Muscular Hypertrophy (Myostatin)

For each condition, the status of the animal will display as follows:

__ F	Free	Indicates that the sample submitted for the animal <b>has been tested</b> and found to be <b>free</b> of the causative mutation responsible for the condition. This animal is homozygous free,
__ C	Carrier	Indicates that the sample submitted for the animal <b>has been tested</b> and found to be a <b>carrier</b> of the causative mutation responsible for the condition. This animal is heterozygous for the mutation, meaning that it has one mutant allele and one normal allele. This animal could pass the mutation to approximately half of its progeny.
__ FU	Free Untested	Indicates that, based on the pedigree information supplied by the breeder of the animal, the animal is <b>expected to be free</b> of the mutation responsible for the condition but <b>has not been tested</b> . However, this animal <b>has not been tested</b> for the causative mutation and Angus Australia gives no guarantee as the animal's free status.
__ %	Carrier	Indicates that, based on the pedigree information supplied by the breeder of the animal, the animal <b>has a chance of being a carrier</b> of the mutation responsible for the condition but <b>has not been tested</b> . The higher the indicated percentage, the larger the chance the animal may be a carrier. To verify the status of this animal, Angus Australia recommends a test be undertaken prior to using this animal for breeding purposes.

## EXPLANATION OF ANIMAL NAME SUFFIX

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV	: both parents have been verified by DNA
SV	: the sire has been verified by DNA
DV	: the dam has been verified by DNA
#	: DNA verification has not been conducted
E	: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively
