

# Angus Australia

## REGISTRATION CERTIFICATE

Animal ID: DXTQ561  
 Animal Name: TEXAS MAJOR Q561<sup>SV</sup>  
 NLIS Visual No/RFID: NH592290DBP02673 / -  
 Register: HBR  
 Sex: Male  
 Date of Birth: 23-AUG-2019  
 Colour: BLACK  
 Breed Percentage: AA 100%  
 Genetic Conditions: AMFU,CAFU,DDFU,NHFU  
 Breeder: TEXAS ANGUS  
 Owner: QWW Wallangra Pastoral Co 100%

### Important Notice

The Angus Society of Australia Limited assures that information contained in this certificate was compiled from records held in our national database at the time of printing, as obtained from breeder supplied records. Whilst every effort is made to ensure the accuracy of this information, the Angus Society of Australia Limited, its officers and employees, assume no responsibility for its content, use or interpretation.

## EXPLANATION OF GENETIC CONDITION CODES

The genetic condition codes indicate the status of an animal for genetic conditions or traits monitored by Angus Australia.

AM	Arthrogryposis Multiplex
CA	Contractural Arachnodactyl
DD	Developmental Duplication
NH	Neuropathic Hydrocephalus
DW	Dwarfism
MA	Alpha Mannosidosis
OH	Oculocutaneous Hypopigmentation
OS	Osteopetrosis
RG	Red Gene
MH	Muscular Hypertrophy (Myostatin)

For each condition, the status of the animal will display as follows:

__ F	Free	Indicates that the sample submitted for the animal <b>has been tested</b> and found to be <b>free</b> of the causative mutation responsible for the condition. This animal is homozygous free,
__ C	Carrier	Indicates that the sample submitted for the animal <b>has been tested</b> and found to be a <b>carrier</b> of the causative mutation responsible for the condition. This animal is heterozygous for the mutation, meaning that it has one mutant allele and one normal allele. This animal could pass the mutation to approximately half of its progeny.
__ FU	Free Untested	Indicates that, based on the pedigree information supplied by the breeder of the animal, the animal <b>is expected to be free</b> of the mutation responsible for the condition but <b>has not been tested</b> . However, this animal <b>has not been tested</b> for the causative mutation and Angus Australia gives no guarantee as the animal's free status.
___ %	Carrier	Indicates that, based on the pedigree information supplied by the breeder of the animal, the animal <b>has a chance of being a carrier</b> of the mutation responsible for the condition but <b>has not been tested</b> . The higher the indicated percentage, the larger the chance the animal may be a carrier. To verify the status of this animal, Angus Australia recommends a test be undertaken prior to using this animal for breeding purposes.

## EXPLANATION OF ANIMAL NAME SUFFIX

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA

SV : the sire has been verified by DNA

DV : the dam has been verified by DNA

# : DNA verification has not been conducted

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively
